Q. 18 of 20 Marks : 1.0, -0.0

A dairyman pays Rs. 6.4 per litre of milk. He adds water and sells the mixture at Rs. 8 per litre, thereby making 37.5% profit. Find the proportion of the water to that of the milk received by the customers.

[This test belongs to Plus Members of KNOWLEDGE GATE]

A 3:10

B 1:10 ✓

C 1:15

D 2:5

Profit% = 37.5% = 3/8
Thus, CP = 8 & SP = (8 + 3) = 11
Now,
Let's amount of pure milk in the mixture be M litres and the amount of water as W litres. The total volume of the mix is (M + W) litres.
Total cost of M litre of milk = 6.4 x M = 6.4M
Selling price of mixture = 8 x (M + W) = 8(M + W)

$$6.4M / 8(M + W) = 8/11$$

$$= 6.4M \times 11 = 8 \times 8 (M + W)$$

$$= 0.1M \times 11 = (M + W)$$

$$= 1.1M = (M + W)$$

$$= 11M = 10(M + W)$$

$$= M = 10W$$

$$= M/W = 10:1$$

$$= W/M = 1:10$$

VERBAL ABILITY (ENGLISH) - FOUNDATION SECTION +4 SECTIONS

Q. 1 of 25 Marks : 1.0, -0.0

Read the passage given below and then answer the questions given below the passage. Some words may be highlighted for your attention. Pay careful attention.

Although the twentieth century saw the rise of women as professional musicians, the majority of composers and performers were, and still are, men. The music industry in the U.S. and Britain overwhelmingly reflects the values of a patriarchal society; the success or failure of a female artist is based largely on her physical appearance and gendered performance style. Blues, rock, and pop began as genres dominated by men, and thus included styles of dress, lyrics, and sound born of a male perspective. The history of these genres, then, is also a history of women seeking to locate their space within a predominately masculine musical environment.

Women are always judged, in part, on their image, and it is through the manipulation of this image that some women artists have been able to push the boundaries of gender identity. Women have been able to enter popular genres of music either by playing with the aesthetics of masculinity, or by playing into a male expectation of femininity. Sexuality, therefore, is a tool women continue to use to shape and reshape their place within popular music.

Pushing boundaries is a balancing act, however, and a contradictory process. In order to gain access to the world of popular music, a female artist must at once be pleasing her audience, and, at the same time, remain true to herself as a woman. A desire to be too much "one of the guys" can lead to identity problems and ultimately to self-destruction. An artist's use of irony or parody may run the risk of being mistaken for genuineness, causing her to be objectified. Working within the limits of popular music has proven difficult and dangerous for women. But due to the professionalism and inventiveness of many female performers, the space for women in popular music is being expanded and redefined.

Females are not naturally inclined as popular musicians.

Q. 4 of 25 Marks : 1.0, -0.0

Read the passage and answer the questions that follow on the basis of the information provided in the passage.

Primitive man was probably more concerned with fire as a source of warmth and as a means of cooking food than as a source of light. Before he discovered less laborious ways of making fire, he had to preserve it, and whenever he went on a journey he carried a firebrand with him. His discovery that the firebrand, from which the torch may very well have developed, could be used for illumination was probably incidental to the primary purpose of preserving a flame. Lamps, too, probably developed by accident. Early man may have had his first conception of a lamp while watching a twig or fibre burning in the molten fat dropped from a roasting carcass. All he had to do was to fashion a vessel to contain fat and float a lighted reed in it. Such lamps, which are made of hollowed stones or sea shells, have persisted in identical form up to quite recent times.

Primitive man's most important use of fire was _____.

[This test belongs to Plus Members of KNOWLEDGE GATE]

On planet Zorba, a solar blast has melted the ice caps on its equator. 8 years after the ice melts, tiny plantoids called, echina start growing on the rocks. Echina grows in the form of a circle and the relationship between the diameter of this circle and the age of echina is given by the formula $d = 2 \sqrt{t} - 8$ for $t \geq 8$ where d represents the diameter in mm and t the number of years since the solar blast. Jagan recorded the radius of some echina at a particular spot as 4 mm. How many years back did the solar blast occur?

The browser's address bar displays the URL learn.knowledgegate.ai/learn/mock-test/346015?id=346015&mode=0&qId=13086186&resultType=2&lessonId=1956306. The main content area of the browser shows a question from a 'TCS NQT 2025 Full Length Mock Test' under the 'ADVANCED REASONING ABILITY - ADVANCE SECTION'. The question asks to predict the next number in a series: 42, 110, 156, 272. The user has selected option A (381). There are four other options: B (372), C (342), and D (422). To the right of the question, there is a grid of numbered circles (1-10) and a calculator icon. Below the question, there are buttons for 'NEXT →' and 'SUBMIT', along with a 'MARK FOR REVIEW' and 'CLEAR' button. At the bottom of the browser window, there is a toolbar with various icons. The taskbar at the bottom of the screen shows several pinned applications: Turnitin, Paper Writer, Unstop, Wellfound, Glassdoor, Naukri, Internshala, Indeed, Cuvette, WhatsApp, Edunexus, Perplexity, Email Verify, Bounce, Flexible, and Portfolio. The system tray on the right shows the date (15/04/2025), time (11:57), battery level (30°C), and weather (Mostly sunny).
